2018 Model Privacy Notice

The Model Privacy Notice (MPN) is a voluntary, openly available resource designed to help health technology developers provide clear notice to consumers about what happens to their digital health data when the consumer uses the developer's product. The MPN's approach is to provide a standardized, easy-to-use framework to help developers clearly convey information about privacy and security to their users. The MPN does not mandate specific policies or substitute for more comprehensive or detailed privacy policies.

The Office of the National Coordinator for Health Information Technology (ONC) updated the 2011 and 2016 versions of the MPN to address the larger variety of products collecting health data emerging on the market. The 2018 version of the MPN template incorporates user feedback from participants of ONC's 2017 Privacy Policy Snapshot Challenge (the Challenge). The Challenge called for developers to create an online MPN generator(s) using the 2016 MPN template. The winning MPN generators assist health technology developers with creating customizable privacy notices that are easy to understand and informative. The generators supplement the consumer-friendly notices with means for providing access to a developer's full privacy policy, and if applicable, HIPAA Notice of Privacy Practices and documentation for adjusting certain user preferences.

Preamble for Health Technology Developers			
What is the Model Privacy	The MPN is a voluntary, openly available resource to help health		
Notice (MPN)?	technology developers who collect digital health data clearly convey		
	information about their privacy policies to their users. Similar to a		
	nutritional label, the MPN provides a snapshot of a company's existing		
	privacy and security policies to encourage transparency and help		
	consumers make informed choices when selecting products. The MPN		
	does not mandate specific policies or substitute for more comprehensive		
	or detailed privacy policies.		
Who is the MPN for?	The MPN is for health technology developers whose technology or app		
	uses and/or shares users' health data ¹ .		
What laws might apply to	Health technology developers should consult the Federal Trade		
you?	Commission (FTC)'s Mobile Health Apps Interactive Tool (which was		
	developed in conjunction with the following Department of Health and		
	Human Services offices and agency: ONC, Office for Civil Rights (OCR), and		
	the Food and Drug Administration (FDA)) to determine if they need to		
	comply with the FTC Act, the FTC's Health Breach Notification Rule, HHS's		
	Health Insurance Portability and Accountability Act (HIPAA) Privacy,		
	Security and Breach Notification Rules, or FDA rules implementing the		
	Federal Food, Drug & Cosmetic Act, as applicable. This tool is not meant		
	to be legal advice about all compliance obligations, but identifies relevant		
	laws and regulations from these three federal agencies.		
Does use of this MPN	of this MPN No. The MPN does not ensure compliance with HIPAA or any other law.		
satisfy HIPAA	A However, the MPN may be used, as applicable, in conjunction with a		
requirements to provide a	HIPAA notice of privacy practices (please see MPN). To find more		
notice of privacy practices?	information on HIPAA directed towards health technology developers,		
	visit the <u>HIPAA Q's Portal for Health App Developers</u> .		

2018 Model Privacy Notice

Note: Developers of consumer health technology or apps ("health technology developers") that collect digital health data about individuals would use this template to disclose to consumers the developer's privacy and security policies. "**We**" refers to the health technology developer or technology product and "**you/your**" refers to the user/consumer of the health technology.

¹ Health data can include, but is not limited to: wellness information (e.g., exercise or fitness habits, nutrition, or sleep data), health markers (e.g., blood pressure, BMI, or glucose), information on physical or mental health conditions, insurance or health care information, or information that integrates into or receives information from a personal health record.

² Include definition of "identifiable data." Identifiable data means: data, such as your name, phone number, email, address, health services, information on your physical or mental health conditions, or your social security number, that can be used on its own or with other information to identify you.

³ If unclear, specify what the developer considers the primary service.

⁴ Include definition of "analytics." Analytics means: the process of examining data to draw conclusions from that information.

⁵ Include definition of "data broker." Data broker means: companies that collect personal information about consumers from a variety of public and non-public sources and resell the information to other companies (From FTC: https://www.ftc.gov/news-events/press-releases/2012/12/ftc-study-data-broker-industrys-collection-use-consumer-data).

⁶ Direct consumers how to adjust permissions.

⁷ Include definition of "encryption." Encryption means: a method of converting an original message of regular text into encoded text in such a way that only authorized parties can read it.

⁸ Include definition of "cloud computing." Cloud computing means: a kind of Internet-based computing that provides shared processing resources and data to computers and other devices on demand.

⁹ Include definition of "deactivation." Deactivation means: an individual takes action or a company ceases operation or deactivates an individual's account due to inactivity.

¹⁰ Include definition of "breach." Breach means: an unauthorized disclosure.
